Wine is one of the most civilized things in the world and one of the most natural things of the world that has been brought to the greatest perfection, and it offers a greater range of enjoyment and appreciation than possibly, any other purely sensory thing."

In cool climate wine regions such as Mosel in Germany, Riesling tends to exhibit apple and tree fruit notes with noticeable levels of acidity that are balanced with residual sugar.

In warmer climate wine regions such as Clare Valley, Riesling tends to display subtle floral aromas and vibrant citrus notes. Riesling also makes fantastic dessert wines, which include ice wine (where the berries are frozen), botrytis affected wine or those that are late picked.

The scale above is developed internally to help you define the sweetness of each Rieslings. The score is seen on each Rieslings after the vintage

“Alone in the plant kingdom.
The vine makes the true taste of the earth intelligible to man.
What a faithful translation it is!
The vine senses, then expresses through its fruit the secrets of the soil”
Colette (1873-1954)

Cabernet Sauvignon is one of the world's most widely recognized and planted red wine grape varieties. It is grown in nearly every major wine producing country among a diverse spectrum of climates from Canada to Lebanon.

The varietal internationally got the recognition through its origin of the fame 'Bordeaux'.

Bordeaux is produced out of two wine regions. These regions are also known as the right and the left bank. Both regions are capable of producing one of the best, long lasting; red wines using grapes such are Merlot, Cabernet Sauvignon, Cabernet Franc, Malbec and Petit Verdot.

Vineyards on the left bank such include Saint-Julien, Margaux, Saint-Estèphe and Pauillac are dominated by cabernet sauvignon with touch of Merlot and Cabernet Franc. The wines of left bank not only last many years but also known for the tannin and stronger intensity depth of flavours.
